

Managing Your NYCHA Password

Purpose: use this document to reset your NYCHA password or Multi-Factor Authentication (MFA) and learn about NYCHA’s password policy.

Remember: your NYCHA password is for your email account ending in “@nycha.nyc.gov”.

Need to reset your password?

If you...	Open the following in a web browser! OR You can click on the link to automatically open it in a browser...	Find More Information
Forgot your password...	https://passwordreset.nycha.info	Learn more
Need to reset your password because it expired...	https://passwordreset.nycha.info (recommended) OR Go to https://aka.ms/security-info	Learn more
Forgot your security questions...	https://aka.ms/security-info	Learn more
Need to reset your MFA (Multi-Factor Authentication)...	https://aka.ms/security-info	Learn more
Need to set up SSPR (Self-Service Password Reset)...	https://aka.ms/ssprsetup	Learn more

Step #	Instructions for Resetting a Forgotten Password
Step 1	<p>Open a web browser and navigate to https://passwordreset.nycha.info</p> <p>You will see the page below:</p> 
Step 2	Enter your NYCHA email address in the textbox under “Email or Username”.
Step 3	<p>Complete the CAPTCHA by entering the characters in the picture in the textbox and click Next.</p> <p><i>If you need to use the audio CAPTCHA, click on the speaker icon and enter the words spoken in the textbox.</i></p> 
Step 4	Then select “I forgot my password” and click Next .

Step #**Instructions for Resetting a Forgotten Password****Step 5**

On the next screen, choose one of your verification methods from the list on the left.

Select your verification method by clicking on its label; you'll notice it is selected when the circle to the left of the label becomes blue.

Once a method is selected, enter any required information and/or click on the button on the bottom of the right panel when ready (methods that require more information will display a grey button until the information required is entered; only after the required information is entered will the button display as blue).

Get back into your account

verification step 1 > verification step 2 > choose a new password

Please choose the first contact method we should use for verification:

- Text my mobile phone
- Call my mobile phone
- Approve a notification on my authenticator app
- Enter a code from my authenticator app
- Security Questions

7 To protect your account, we need you to enter your complete mobile phone number (*****64) below. You will then receive a text message with a verification code which can be used to reset your password.

Enter your phone number

Step # **Instructions for Resetting Your Security Questions**

Step 8 A drop-down menu will display, allowing you to choose a new method.
Select “Security questions” from the drop-down.

Step 9 Select “Add”.

Step #

Instructions for Resetting Your Security Questions

Step 10

On the next screen, a list of four security question drop-downs will appear.

For each drop-down, select a security question and provide an answer.

A screenshot of a mobile application screen titled "Security questions" with a close button (X) in the top right corner. The screen contains four identical drop-down menus, each with the text "Select a question" and a downward arrow. The first drop-down menu is highlighted with a red rectangular border. At the bottom of the screen, there are two buttons: "Cancel" and "Done".

A screenshot of a mobile application screen showing a list of security questions. The questions are: "What is your favorite food?", "What was the last name of your favorite grade school teacher?", "What was the make and model of your first car or motorcycle?", "What was the name of your favorite stuffed animal?", "What was the name of your first pet?", "What is your Four-Digit PIN?", "What is your Mother's maiden name?", and "What is your favorite Country?". Each question is followed by a "Select" button. A red rectangular border highlights the list of questions. Below the list, there is a red circle containing the number "10".

Step #**Instructions for Resetting Your Security Questions****Step 11**

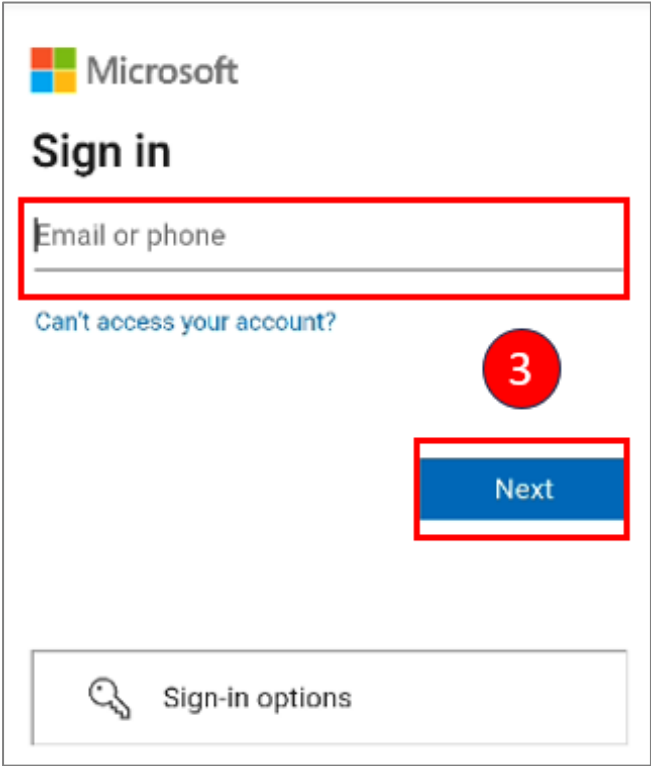

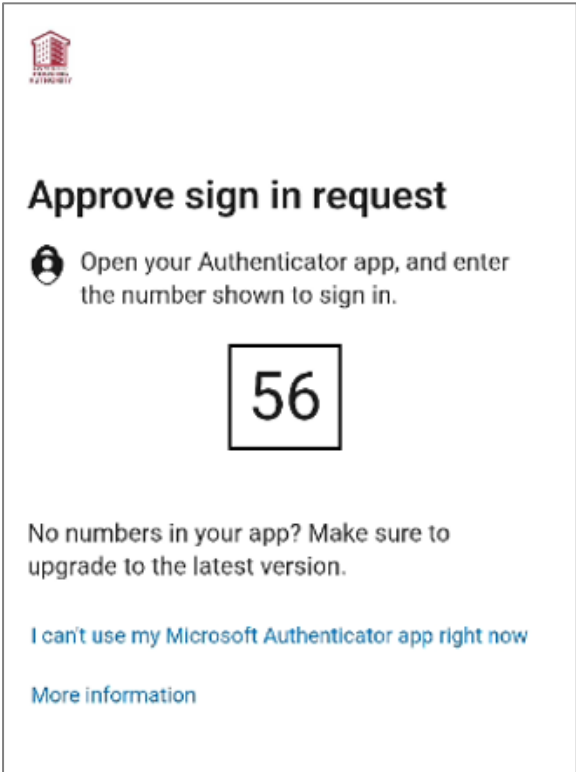

Once you've answered each question, select **“Done”**.

Note: The answers to your questions are **case sensitive**, which means that **you must answer your questions the same way you wrote them**.

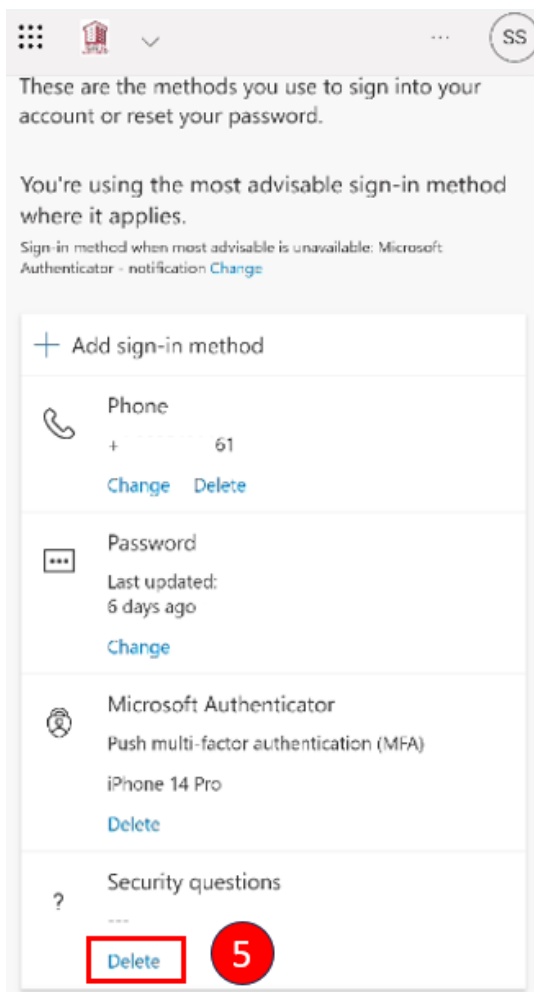

****Taking a photo or writing your answers down will help you when answering them, since you can return to them later.****

You will receive a notice indicating that your security questions have been successfully registered.

Step #	Instructions for Resetting Your MFA
Step 1	Open a web browser and navigate to https://aka.ms/security-info
Step 2	<p>Enter your NYCHA email and click Next.</p>  <p>The screenshot shows the Microsoft sign-in interface. At the top left is the Microsoft logo. Below it is the heading "Sign in". Password Policy and Requirements

1. Password Requirements

When creating a password for your NYCHA account, make sure:

- Your password contains **at least** 15 characters **AND...**
- Meets at least **three** of the following complexity requirements:
 - Includes uppercase letters (e.g., A-Z)
 - Includes lowercase letters (e.g., a-z)
 - Includes numbers (e.g., 1-9)
 - Includes a special character (e.g., @, \$, !, etc.)

2. Password Security

You are required to **keep your password confidential** at all times. **Never share your password** with anyone, including supervisors, colleagues, or other staff members. Sharing your password puts sensitive information at risk and may lead to unauthorized access to your account. If you believe your password has been compromised, you must open a ticket on **ES Connect** by visiting nychahelp.service-now.com/esc and clicking "Report an IT Issue."

You should either use a **password manager** to securely store your passwords or store them in a secure place that only you can access. If you need assistance with setting up a password manager, the IT team can help guide you.

3. Mandatory Email Access

You are **required to check your NYCHA email account regularly** to stay updated on work-related communications, important notices, and IT-related updates. You must check your email **at least once every day**. If checking your email daily is not possible, you must check it **at least once a month**.

If you fail to log in to your email account regularly, your account may **expire or become deactivated**. Accounts that remain inactive for long periods will be automatically deactivated for security reasons, and you may lose access to important systems and communications.

4. Account Responsibility

You are **responsible for knowing your NYCHA email address and password at all times**. If you forget your credentials or have trouble accessing your account, you must immediately open a ticket on **ES Connect** by visiting nychahelp.service-now.com/esc and clicking "Report an IT Issue." You can also call the **IT Service Desk** at **212-306-7000** for assistance. IT will help with resetting passwords and recovering accounts, but it is your responsibility to maintain your login information securely.

5. Microsoft Authenticator Requirement

For extra security, **you must use Microsoft Authenticator** for two-factor authentication when signing in to NYCHA systems. This app provides an additional layer of protection by requiring a second verification step after entering your password.

NYCHA Mobile Device (Handheld): If you have a NYCHA-issued mobile device, often referred to as a "handheld," you must have the Microsoft Authenticator app installed and set up on that device.

Personal Device: If you do not have a NYCHA-issued handheld device, you are required to download the Microsoft Authenticator app on your **personal mobile device**. While NYCHA cannot guarantee the provision of a handheld device, using the Microsoft Authenticator app on your personal device is mandatory for accessing NYCHA systems.

NOTE: The **Microsoft Authenticator app does not collect or store any personal data**. It is used solely for generating time-based, one-time passcodes (TOTP) for secure login. The app works as a general key logger for authentication purposes and does not track your activities or record any data outside of its intended function.

6. Enforcement

Failure to follow this policy may result in the loss of access to NYCHA systems, potential security risks, and other issues related to account management. You are expected to comply with this policy to help maintain the security and efficiency of NYCHA's IT environment.

Need assistance?

For help with passwords, email access, or any IT-related issues, you can open a ticket on ES Connect by visiting nychahelp.service-now.com/esc and clicking "Report an IT Issue," or call the IT Service Desk at 212-306-7000.
